

Airport Extreme port forwarding

1. Launch Airport Utility
2. Click "Edit"
3. Select "Network"
4. Click the (+) Symbol under "Port Settings"

5. Enter the monitor's Private IP address and Port number (This information is located on the iBaby app Setup>Camera Information)

Base System Internet Wireless Disk

Firewall Entry Type: IPv4 Port Mapping

Window Mode: Standard NAT

Description: iBaby

Public UDP Ports: 14971

Public TCP Ports: 14971

Private IP Address: 10.0.1.201

Private UDP Ports: 14971

Private TCP Ports: 14971

The port mapping entry you entered already exists.
